surabhisalunke05@gmail.com

Password *

.....

Make sure it's at least 15 characters OR at least 8 characters including a number and a lowercase letter.
[Learn more.](#)

Email preferences

☒ Send me occasional product updates, announcements, and offers.

Verify your account

Create account

Step 3 : After clicking on create account you will be directed to this page:

Please verify your email address

Before you can contribute on GitHub, we need you to verify your email address.

An email containing verification instructions was sent to surabhisalunke05@gmail.com.

[Resend verification email](#)[Change your email settings](#)

Step 4: Check your email for a verification mail from GitHub

The email will look something like this:

[GitHub] Please verify your email address.

GitHub <noreply@github.com>

4:04 PM

To: salunkesurabhi

Almost done, @salunkesurabhi! To complete your GitHub sign up, we just need to verify your email address: surabhisalunke05@gmail.com.

Verify email address

Once verified, you can start using all of GitHub's features to explore, build, and share projects.

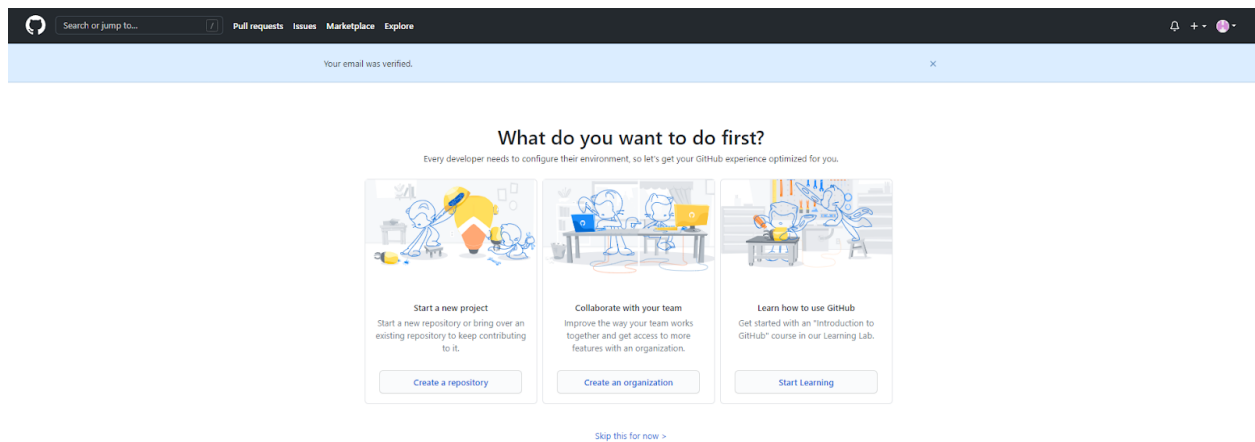

Button not working? Paste the following link into your browser:

https://github.com/users/salunkesurabhi/emails/149456487/confirm_verification/45dc0b3d5701ac44c051d68723c0a4ff59f3ae2f

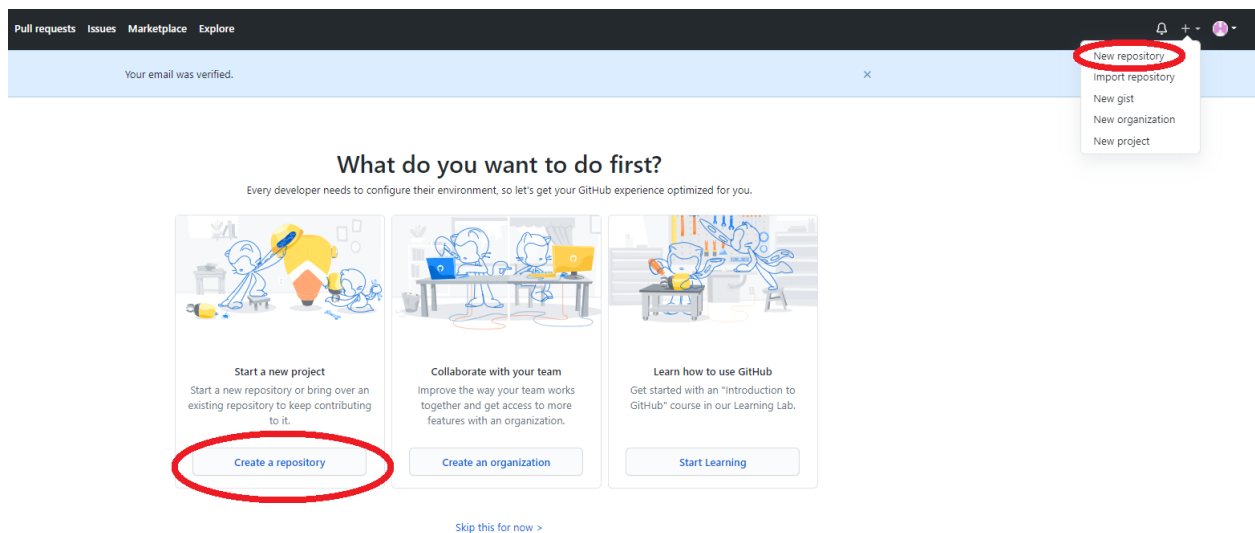

You're receiving this email because you recently created a new GitHub account or added a new email address. If this wasn't you, please ignore this email.

[Email preferences](#) · [Terms](#) · [Privacy](#) · [Sign into GitHub](#)

Step 5: Click on verify email address it will take you to this page:

Step 6: to create a repository

Step 7: fill in the information shown according:

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Create a new repository

Owner *

 salunkesurabhi ▾

Repository name *

/

surabhi

Great repository names are short and memorable. Need inspiration? How about [symmetrical-octo-disco](#)?

Description (optional)

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☒ Add a README file

This is where you can write a long description for your project. [Learn more.](#)

☐ Add .gitignore

Choose which files not to track from a list of templates. [Learn more.](#)

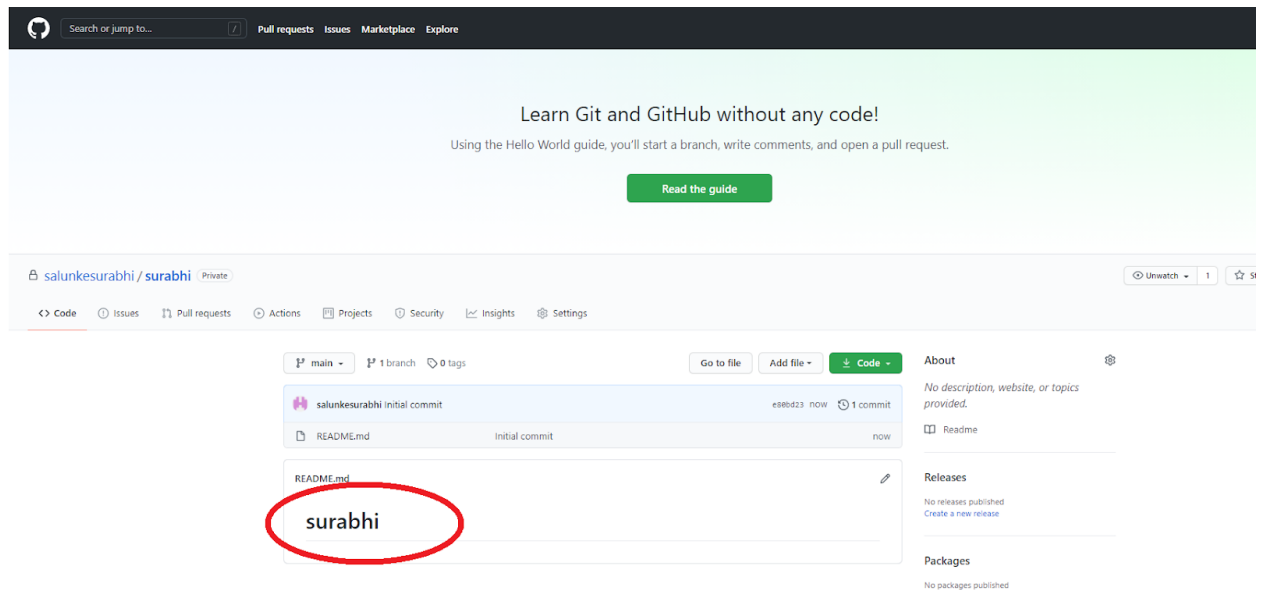

☐ Choose a license

A license tells others what they can and can't do with your code. [Learn more.](#)

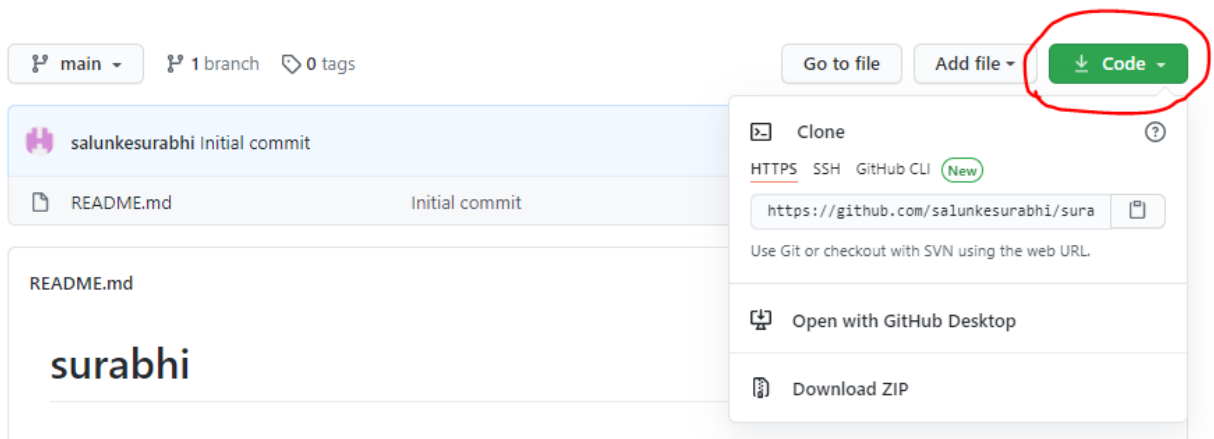

This will set  main as the default branch. Change the default name in your [settings](#).

Create repository

Step 8: you will see your repository on your account

Step 9: to clone the repository click on the green color code button:

Step 10: copy the url by clicking on the small clipboard icon:
