[Resend verification email](#)

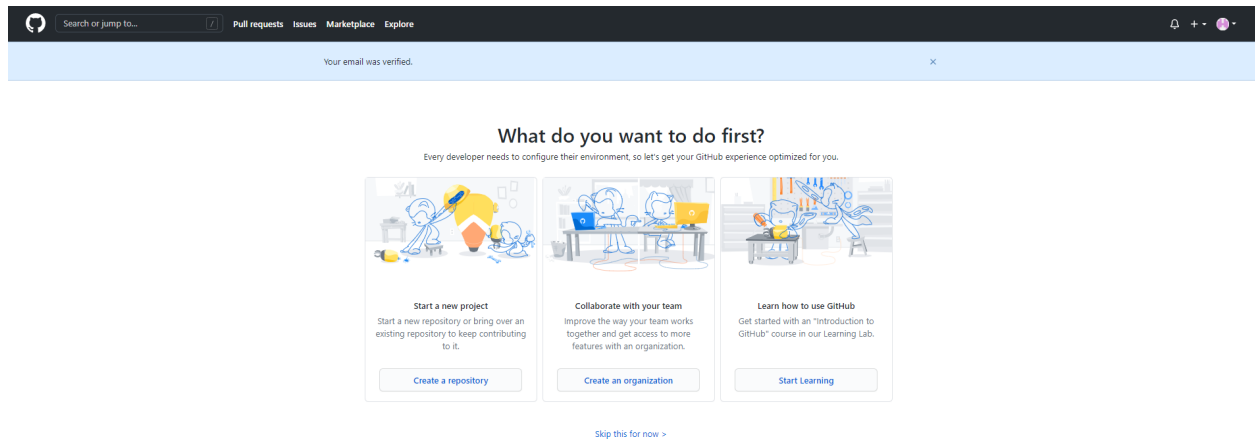

[Change your email settings](#)

Step 4: Check your email for a verification mail from GitHub

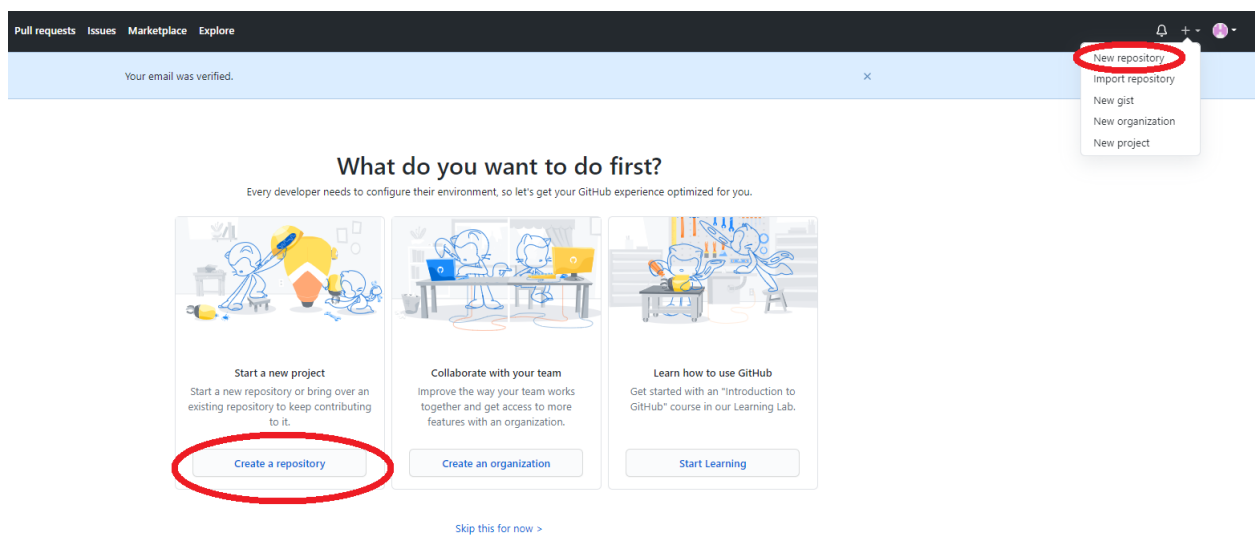

The email will look something like this:

Step 5: Click on verify email address it will take you to this page:

Step 6: to create a repository

Step 7: fill in the information shown according:

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

## Create a new repository

Owner \*

 salunkesurabhi ▾

Repository name \*

/

surabhi

Great repository names are short and memorable. Need inspiration? How about [symmetrical-octo-disco](#)?

Description (optional)

**Public**

Anyone on the internet can see this repository. You choose who can commit.

**Private**

You choose who can see and commit to this repository.

**Initialize this repository with:**

Skip this step if you're importing an existing repository.

☒ **Add a README file**

This is where you can write a long description for your project. [Learn more.](#)

☐ **Add .gitignore**

Choose which files not to track from a list of templates. [Learn more.](#)

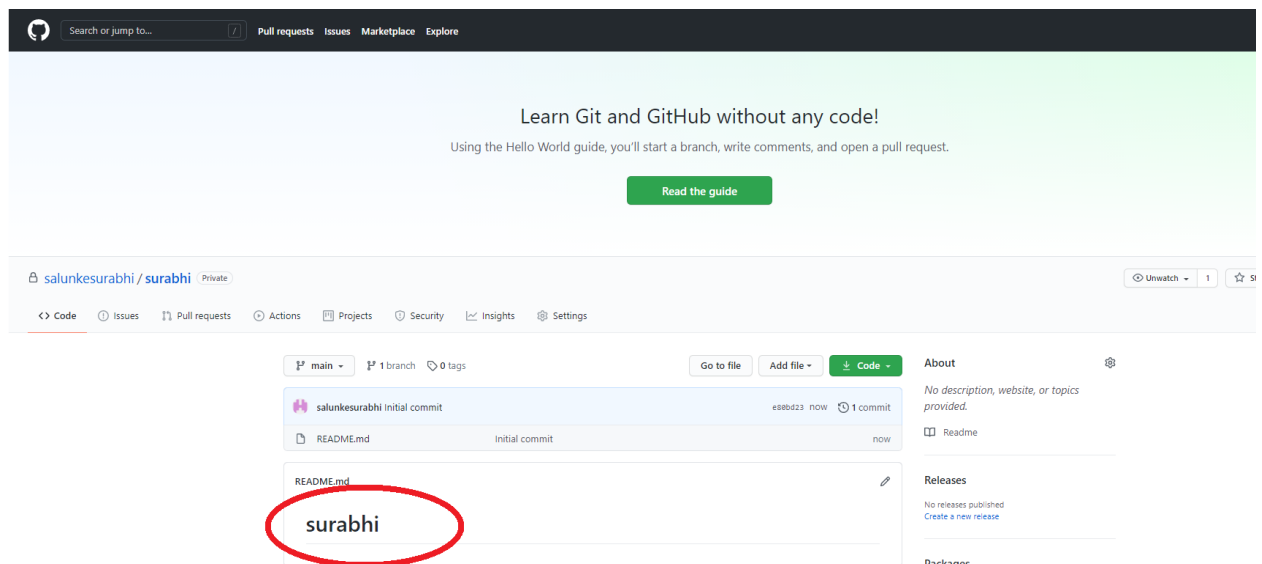

☐ **Choose a license**

A license tells others what they can and can't do with your code. [Learn more.](#)

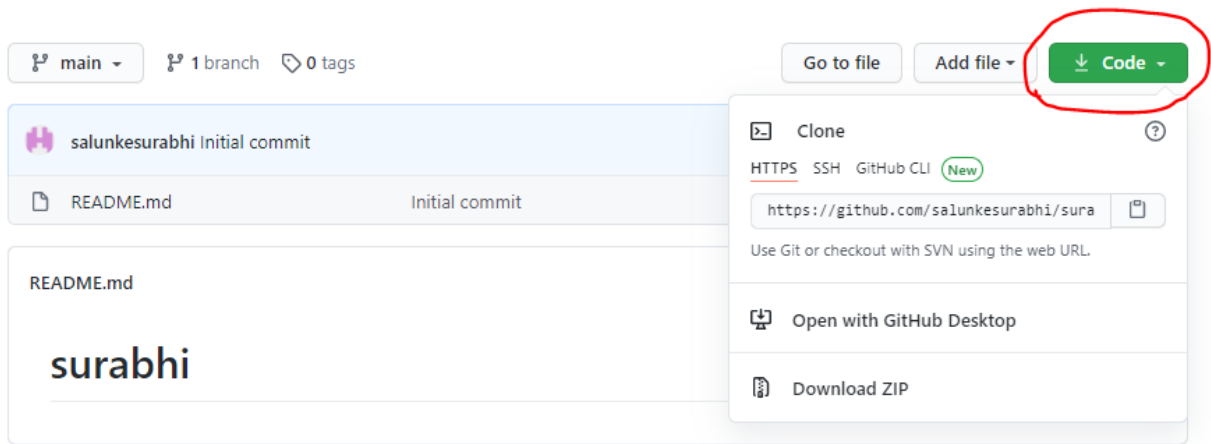

This will set  `main` as the default branch. Change the default name in your [settings](#).

Create repository

Step 8: you will see your repository on your account

Step 9: to clone the repository click on the green color code button:

Step 10: copy the url by clicking on the small clipboard icon:
